Deadline Y2K-Mark Joseph 2015-06-02 On New Year's Eve 1999, a chain reaction of computer malfunctions turns what was to be a global gala into a catastrophe. When computers begin to fail along the international dateline, the infection moves westward, causing massive power failures, train and airplane wrecks, and general havoc. As the "Millennium Bug" passes hour by hour through each time zone, it moves inexorably toward the epicenter of the global economy, New York, and the thousands of computers that control the world's monetary systems. The Midnight Club, a group of cyberpunks led by
Michael "Doc" Downs, has the solution—but they also have an adversary: energetic venture Capitalist Donald Copeland, who has designs on using his technological prowess to "capitalize" on the impending disaster. Around 10:30 A.M. on December 31, a Safeway in New York is hit by the Bug, sent all the way form Guam. All systems freeze, and what begins as a simple malfunction snowballs into looting and rioting. Pandemonium reigns on the streets of Manhattan. As the day progresses, the blaze of fear increases to the point of insanity. In the style of Michael Crichton and Stephen Coonts, Mark Joseph has created a techno-thriller that is sure to touch a nerve in everyone as the millennium draws closer.

eXtreme Project Management - Douglas DeCarlo
2010-10-01 Today's new breed, eXtreme projects are different. They feature high speed, high change, high complexity, high risk, and high stress. While traditional projects follow the classic model of ready, aim, fire, eXtreme project managers succeed by shooting the gun and then redirecting the bullet while not loosing sight of their moving target. eXtreme Project Management provides a practical guide for leaders working under high risk and high pressure while producing the desired bottom-line results. Based on Doug DeCarlo's extensive experience in working with more than 250 project teams, his eXtreme project management model is built around an integrated set of principles, values, skills, tools, and practices proven to consistently work under conditions of rapid change and uncertainty. eXtreme project management is based on the premise that you don't manage the unknown the same way you manage the known. It's a people-centric approach to high performance that makes quality of life a fundamental part of the project venture.
